- Trails

These landuse colours are assigned by the author.

Landuse Map of Landmarks
Cambridge City, MA (2022)

The map was created in QGIS by importing shapefiles and symbolizing the landuse of various landmarks in the city of Cambridge. All data and shapefiles are sourced from United States Census TIGER/Line files. My friends Roua and Sophie helped me by suggesting to change the colours of water bodies and landuse to make them stand out and make it readable.
