

Mutungo Biina Church Route from the Old Taxi Park in Kampala, Uganda

On Thursday, September 4, 2025 at 3:43pm, a taxi on the Mutungo Biina Church Route departed from the Old Taxi Park and traveled about 11.4 kilometers to its final destination. The taxi departed with all seats filled (14 passengers). The first passenger to exit the vehicle did so about halfway through the route, after which the passenger load gradually decreased until the taxi reached its destination. The taxi took about 67 minutes to complete its route.

Text Responses

1. I am satisfied with this map. There are some odd-gaps in the route line where the route turns. If I had had more time, I might have spent some time in Illustrator or Photoshop smoothing those out. The PDF export seems to add a border around the map I don't see on the png file or the word document, so that is something that could be worth troubleshooting as well.
2. I had to do some web-searching to figure out how to split the linestring into segments based on the point locations. I also consulted with my colleagues, Gabriel Kreindler and Tamara Kerzhner about the concept of representing passenger loads by line thickness.
3. Immaculate Tumwikirize collected the data using the GPS Logger app on an Android phone. I use the sf package in R to visualize the data and create the map. I downloaded the basemap using the maptiles package. I added the legend using the ggspatial package. I added the North arrow and the label for the Old Taxi Park in Microsoft Word, and I created the rest of the layout in Microsoft Word.
4. Yes, you have my permission to post this assignment on the course website.
