(park facilities filtered to CLASS = "BICYCLE RENTAL SHOP")

Text Responses

1. I am somewhat satisfied with this submission. I mostly used the same symbology on the city map and on the detail map, but I used a different color scale for distance to better show the variation within the detailed map. I'm not sure that the three separate legends really works, or if the distance legend/symbology for the city map is necessary.
2. I consulted course lecture notes to complete this assignment, and used Stack Overflow to search for how to plot the legend separately from the map.
3. I created my maps in R and created the layout using Microsoft Word.
4. Yes, you have permission to post my work.
